

# **2014 AAB Conference – CRB Symposium**

## **Oral Presentations**

- 24 Chromosome Aneuploidy Screening and FET Allows for High Pregnancy Rates and the Opportunity for Elective Single Embryo Transfer
- Blastocyst Cell Differentiation and Phi: Assessment of Inner Cell Mass and Trophectoderm Cell Number in Mouse Embryos Cultured in Different Media Quality
- Blastocyst Quality, Phi and Implantation Potential: An Objective Analysis for General Classification and Blastocyst Selection for Single Embryo Transfer
- Comparison of a Sequential Culture Media and Single Step Culture Media Systems
- Effect of Denuding Oocytes Following Brief Co-Incubation with Sperm for Fertilization Assessment with Time-Lapse Imaging
- Liquid Nitrogen Vapor Sealing of Straw Containers Can be Unsafe and Detrimental to Embryo Survival: A microSecure™ Re-Vitrification (rVTF) Model

## **Poster Presentations**

- Accurate Diagnosis as a Prognostic Factor in Intrauterine Insemination (IUI) Treatment of Infertile Saudi Patients
- Cryopreservation of Testicular Sperm Prior to Vasovasostomy: A Ten-Year Experience
- Do Day 3 Embryo Transfer Patients Benefit from Extended Embryo Culture and Day 5 Embryo Transfer?
- Effect of Accidental Warming Intervals on the Survival of Vitrified Human Blastocysts
- Effect of Incubation Times Before and After the Removal of Cumulus Cells on the Developmental Competence of Oocytes in Patients Undergoing Intracytoplasmic Sperm Injection (ICSI) Treatment Cycle
- Effect of Recent Teratozoospermia Diagnosis on IVF Fertilization and Clinical Pregnancy Rates Using ICSI or Conventional Insemination
- Evaluation of H. pylori IgA Immunoassay: Concerns on High Rates of Positive IgA Results in IgG Negative Healthy Subjects
- Incidental Exposure of Pronuclear and Cleavage Stage Embryos to Fluctuations in Oxygen Concentrations During Incubation: Continued Development at Extended Culture, Freezing and Pregnancy Outcomes
- Preparation of Warming Medium for Vitrified Specimens – Effects on the Final Warming Temperature
- Relationship of IVF/ET Cycle Volume and Outcomes in Texas for 2012
- Rescue Intracytoplasmic Sperm Injection (ICSI) and Delayed Embryo Transfer (ET) Resulting in Live Birth: A Case Report
- Semen Cryopreservation Prior to IVF: Analysis of 165 Patients During a Ten-Year Period of Time
- The Effect of Daily Ejaculation on Semen Parameters and Sperm DNA Damage in Normal Men
