Online Courses (Must be ordered online or call (800)457-3332): - **NEW Molecular Diagnostics** - Clinical Genomics: A Review of Technology and Clinical Applications (2017) and **Andrology and Embryology** (2017). Also available: Basic Laboratory Knowledge, Chemistry Review, Immunohematology, Immunology and Serology, Microbiology, and Molecular Diagnostics.

TOTAL ENCLOSED \$ _____

Easy Ways To ORDER: online - ordering online is easy at www.aab.org, phone - just call (800)457-3332 (in St. Louis, call 241-9809) and have your credit card information ready, fax - fill out the order form with your credit card information and dial our 24-hour fax number at (314)241-1449, or mail - fill out the order form and mail with applicable payment to: AAB, 906 Olive Street, Ste. 1200, St. Louis, MO 63101-1448.

Andrology And Embryology Review Course Manual, 2017

AAB's new updated and revised **Andrology And Embryology Review Course Manual** is a comprehensive review of andrology and embryology. It is designed to assist individuals who are new to the field, who are updating and adding to their knowledge of the field, or who are preparing for certification examinations as Directors (HCLD and ELD), Technical Supervisors (TS) and Embryology Laboratory Scientist (ELS/MT) and Andrology Laboratory Scientist (ALS/MT).

The **A&E Review Manual** contains 765 pages and covers the following topics:

- Female Reproductive Physiology;
- Fertilization and Early Embryo Development;
- Ovarian Stimulation;
- Male Reproductive Physiology;
- Semen Analysis;
- Sperm Cervical Mucus Interaction and Antisperm Antibody Testing;
- Sperm Function Tests;
- Preparation of Gametes for Assisted Reproductive Technologies;
- Culture Techniques;
- Micromanipulation of Gametes and Embryos (ICSI, AZH, Biopsy) in Assisted Reproductive Technologies;
- Embryo Selection and Transfer;
- Optimal Embryo Transfer and Management of the Luteal Phase;
- QC and QA in the ART Laboratory;
- Sperm Cryopreservation;
- Basic Cryobiology of Embryos;
- Male Infertility and the New Genetics;
- Preimplantation Genetic Diagnosis (PGD) and Preimplantation Genetic Screening;
- General Laboratory Management;
- Employment Law;
- Clinical Laboratory Improvement Amendments of 1988 (CLIA '88);
- Occupational Safety and Health Act (OSHA);
- Embryology Laboratory Management;
- Basic Blood Collection and Handling;
- Guide to New Globally Harmonized System of Classification and Labeling of Chemicals

Day 5: Approximately 120 hours post-insemination, expanded blastocyst stage embryos

NOTE: This manual includes andrology, embryology and general knowledge for HCLDs, ELDs and MTs.

Edition: March 2017 - Available in English

General Knowledge Manuals

The following manuals will help individuals who are seeking a comprehensive review of regulatory, safety, quality control/quality assurance, and other administrative topics in laboratory management/supervision. Also useful in preparing for certification examinations as high-complexity, moderate-complexity or embryology laboratory directors:

● **General Knowledge For The Clinical Lab Director (HCLD).** 2017. 271 pages. Topics include: General Laboratory Management, Employment Law, CLIA '88, OSHA, Basic Blood Collection and Handling, and Guide to New Globally Harmonized System of Classification and Labeling of Chemicals.

● **General Knowledge For The Embryology Lab Director (ELD).** 2017. 354 pages. Topics include: QA and QC in the ART Laboratory, Embryology and General Laboratory Management, Employment Law, CLIA '88, OSHA, Basic Blood Collection and Handling, and Guide to New Globally Harmonized System of Classification and Labeling of Chemicals.

NOTE: This information can also be found in the *Andrology and Embryology Review Course Manual* along with andrology and embryology related topics.

Edition: March 2017

Quality Assurance Manual for ART Laboratories

The **Quality Assurance Manual For ART Laboratories** is an electronic tool to assist in creating a customized QA program for Assisted Reproductive Technology (A.R.T.) laboratories. This CD-ROM was designed for laboratories that offer both andrology and embryology laboratory services. If your laboratory only offers andrology or only embryology services, you can delete the sections that are not pertinent.

This manual is composed of three Microsoft Word documents on a CD-ROM:

- **Read Me First.doc** – This document provides instructions for modifying the QA manual to make it specific for your laboratory.
- **Tutorial.doc** – This document provides recommendations on how to modify the QA manual, indicates each place that requires you to input specific data, and make recommendations on what you should enter. You should use this document to aid you in tailoring the actual QA manual for your specific use.
- **Manual.doc** – This document contains text fields that will need to be modified for your specific use.

AAB HCT/P Manual

The **AAB HCT/P Manual** is a generic procedure manual that will cover the basics for FDA compliance. **Included with the manual are numerous forms, which will assist you in documenting your compliance.** These include, forms for Donor Medical History (Screening), Donor Physical Assessment, Donor Eligibility Determination, Agreements with contract facilities (such as testing laboratories), and many others designed to make implementing your compliance program easier and quicker. In addition, the complete FDA regulations, Draft Guidances, and Q & A for Final Rule, as well as other helpful information are included.

This comprehensive Manual is in electronic format and is easily updated as changes occur to the regulation and your program. While you will need to review the procedure manual on the CD-ROM and make changes to reflect the individuality of your program, the electronic format will greatly simplify the process. The CD also includes a step-by-step tutorial that will lead you through the required changes. The result will be a tailor-made procedure manual specific for your program that you can pull together in a short period of time.

PER Handbook

A must when studying for state licensing or private certifying exams, or as a convenient reference for day-to-day laboratory work.

- Completely revised and updated;
- 25% bigger than last edition, includes 586 pages of the latest information about techniques in clinical chemistry, hematology, blood banking, bacteriology, parasitology, mycology, virology, immunology, serology, laboratory math, quality control procedures, and laboratory supervision/management;

- Drawings, charts, and diagrams;
- Clean, concise information written in an outline format;
- Excellent study guide for novices, students, recent graduates, and specialists no longer familiar with all lab disciplines who are studying for an exam or considering expanding into other disciplines;
- Helpful guidelines for studying and taking examinations;
- Convenient reference for day-to-day use in the clinical laboratory;
- In-depth guide to laboratory math calculations; and an
- Expanded index for easy reference.

Review Manual for Public Health Microbiology

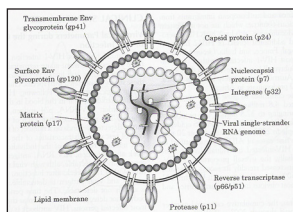

- A comprehensive review and reference manual written by experts in the field of public health microbiology.
- A valuable study guide developed to correlate with the content outline for the American Board of Bioanalysis (ABB) public health microbiology certification examination.

Authors

- *Phil Amuso, Ph.D., HCLD/CC(ABB)*
Retired, Former Associate Bureau Chief, Florida Bureau of Laboratories, Tampa, Florida
- *Robyn Atkinson-Dunn, Ph.D., HCLD/PHLD(ABB)*
Director, Unified Utah State Laboratories, Taylorsville, Utah
- *Jack Deboy, Dr.PH*
Retired – Former Director, Maryland Laboratories Administration, Baltimore, Maryland
- *Frances P. Downes, Dr.PH, HCLD(ABB)*
Director, Michigan Public Health Laboratory, Department of Community Health, Lansing, Michigan
- *Ryan Brock Neil, Ph.D., TS(ABB)*
Manager, Division of Laboratory Services, Tennessee Department of Health, Nashville, Tennessee
- *David L. Smalley, Ph.D., BCLD/PHLD(ABB)*
Director, Division of Laboratory Services, Tennessee Department of Health, Nashville, Tennessee
- *Musau Wakabongo, Ph.D., HCLD(ABB)*
Director, Placer County Public Health Laboratory, Auburn, California
- *Leslie Wolf, Ph.D., HCLD(ABB)*
Director, North Carolina State Laboratory of Public Health, Raleigh, North Carolina

Content:

- Bacteriology
- Environmental Microbiology
- Parasitology
- Mycology
- Virology/Molecular Microbiology
- Epidemiology in the Community
- Immunology of Infectious Diseases
- Quality Control/Quality Assurance

POLT Handbook

Detailed instructions about basic laboratory procedures and policies for physician office laboratories at your fingertips. Easy-to-read outline format with over 200 diagrams and illustrations.

Topics include:

- requisitions for laboratory procedures,
- specimen collection,
- quality control,
- manuals/recordkeeping/documentation,
- laboratory environment,
- instrumentation and equipment,
- math,
- cells,
- hematology,
- coagulation,
- chemistry,
- immunology/serology,
- microbiology, and
- administrative functions.

QA Manual For Physician Office, Independent And Hospital Clinical Labs

AAB's **Quality Assurance Manual** is an electronic tool to assist you in creating a customized QA program for your laboratory. This manual includes easy-to-follow instructions for structuring your laboratory's comprehensive quality assurance program by using Microsoft Word documents with detailed instructions.

CD-ROM version! Includes electronic documents that you can tailor to fit your laboratory's needs

The original **QA Manual** was prepared as a tool to assist laboratories in meeting the CLIA '88 quality assurance requirements. The guide has been adapted for easy implementation of use on this new CD-ROM. Although every laboratory is unique in its approach to quality assurance and in the services offered, every laboratory must meet at least the minimum requirements for an effective QA program. This manual was designed to assist physician office, independent and hospital clinical laboratories in achieving this goal.

AAB's **Quality Assurance Manual** on CD-ROM includes:

- Quality Assurance Overview
- Quality Assurance Plan
- Quality Assurance Forms – Microsoft Word documents, including detailed instructions that you can tailor to meet your laboratory's needs
 - QA Committee Meeting Form
 - QA Problems Encountered Form
 - QA Incident Report Form
 - Customer Comment Form
 - Proficiency Testing Corrective Action Form
 - Proficiency Test Failure Investigation Checklist
 - QA Monthly Review Form
 - QA Quarterly Review Form
 - Annual QA Assessment Form
 - Competency Checklist
 - Technologist Test Procedure Evaluation Form
 - Personnel Safety Checklist

Edition: 2005

Total Quality Management (TQM) In The Clinical Laboratory

by: Doug Hutchison, Ph.D.,
CLD, CQE(ASQC)

This book has what you need to know about the theory and history of TQM as well as the practical aspects of its use in your laboratory. In over 260 pages, with 77 illustrations, Dr. Hutchison describes the practical considerations of TQM specifically as they relate to the clinical laboratory. Included are appendices that address current CLIA topics as they relate to TQM, including the Quality Assurance program required under the final CLIA '88 regulations.

The book details the principles used by the TQM pioneers Drs. W. Edwards Deming and Joseph M. Juran. In addition, practical use of these principles in addressing CLIA '88 requirements is demonstrated.

Revised: 1994
